Subject: Inappropriate Social Media and Public Behavior

I am quite frankly appalled. This inappropriate behavior was just brought to my attention by a former student of yours. I am not one to involve myself in politics but the blatant racism and misogyny is inexcusable. Mr. Snell's Facebook page was found easily as could be by any student or parents involved with this school. These are just a few of many offensive, disgusting posts.

Mr. Snell has also been witnessed in public going directly against CDC guidelines and endangering the lives of the general public as he has also confessed to such actions in one of the posts provided below. I have no direct intent with this email but to inform you of such actions. I do not expect a response I only ask to remain anonymous to Mr. Snell as to me he seems to exhibit dangerous behaviors.

The images below were provided to me by said former student, they would prefer to remain anonymous entirely. They have also made a formal report through your website, thank you. -Joanna

Now this is strange. Just went to <https://www.cnn.com/> to check the the covid updates .

Strange thing there really wasn't anything, just one blurb of fear-porn to get people to hoard toilet paper again, under a story about "comedian" Colbert.

What gives cnn, are we still in a pandemic? Don't you care about covid anymore?

What are other sites like that are normally COVID COVID COVID? What happened to all the wear a mask billboards?

I went to the store this morning and saw 6 other people with no masks--I'm usually the only one. What do you see?

Was it ever about the virus, or was it always about the election--to provide a means to an end?

The great Texas bus caper. Libtard clearly had abandoned the lane, then tried to push the truck off the road. You are welcome FBI, your job is clear, arrest the libtard for bad driving.
